

SCRAA Phase II Key Stakeholder Interviews July 28, 2008

A. Additional Interviewees...

In view of recent changes in the airline industry which, if any, airport operators do you think we need to interview?

B. Additional Questions...

In addition to the four (4) basic questions set forth in our July 22, 2008 SCRAA Phase II paper, these are some additional questions we may want to ask. Any thoughts about these questions or suggestions for others?

5. What impact do you think the airline's recent reduction in flights in response to fuel price hikes will have on efforts to decentralize air traffic?
6. Will the reduction of flights at LAX and Ontario help or hurt planning for regionalization and do you think these changes are long or short term?
7. What ground transportation projects would be most and least affected by these recent changes in airline scheduling?
8. Are there other agencies or entities who could be helpful in implementing ground transportation projects?
